

# Employee Spotlight

## Cheri Martensen

*Director of Imaging*

Cheri Martensen is the Director of Imaging at Midwest Medical Center. She has been a part of our team for twelve years and is well deserving of this recognition as Employee of the Month. Cheri handles the immense job of overseeing the Imaging Department as well as performing general x-ray and CT exams.

Cheri's passion for her field of expertise is evident. Not only does she have an exceptional knowledge of the various modalities in her department, she is also a strong leader and mentor to her team members and a champion for her patients. She understands that each patient is coming to her with an unknown and she fully appreciates that her patients look to her for calming reassurance. Cheri says that the most rewarding part about her job is knowing that sometimes she really does make a difference in someone's life.

When asked what she enjoys doing in her spare time Cheri replied "With three young children, I do not have much spare time, but I love to grab a magazine or book and steal a minute or two away when I can."

We recognize and thank Cheri Martensen for her years of enthusiasm and commitment to her job and to Midwest Medical Center.
