

Employee Spotlight

Glenna McNeely

Medical Laboratory Technologist

Not content just to work at MMC, Glenna McNeely also volunteers. She was doing just that in the Gift Shop recently when the Adult Day Care group visited the cafeteria. Glenna hopped from one volunteer post to another, helping settle the large group of 18 at their table, delivering silverware and condiments with a smile.

Glenna's "double duty" as a volunteer and willingness to help wherever needed were the reasons she was nominated for Employee of the Month, but when she's not wearing her "Super Volunteer" cape she's working as a Medical Laboratory Technologist. She draws and analyzes blood samples and her patients can range from regular lab visitors to trauma cases in critical condition.

"I like being involved in the welfare of people in my community," Glenna said. "On any given day I can see parents, friends and neighbors." Glenna's first Code Blue was especially memorable. "I was able to work as part of a team and the patient was revived. It was a thrill to be involved."

In addition to her work and volunteerism Glenna also finds time to indulge in "non-MMC" activities, including watching her two sons play sports, reading, making jewelry and walking her Newfoundland dogs.
